

## Rock and Roll Research Poster

Name: \_\_\_\_\_ Name of Rock: \_\_\_\_\_ Due: \_\_\_\_\_

**Directions:** I will assign you a rock type for you to research using Internet sources. Using the rubric below, research the rock type you are given and create a poster on a sheet of regular copy paper. You may use Word, Publisher, PowerPoint (one slide basically) or make a poster neatly by hand.

**Requirements/Caution:**

- **Appearance:** You should take up ALL of the space on the paper so adjust FONT sizes appropriately. There should be a clear picture of your rock. More pictures are welcome but should enhance or show examples only.
- **Plagiarism:** Do not copy the Internet word for word. This is plagiarism and makes it very easy for me to grade (0).
- **Citations:** Include the websites, books, journals, or research you used on the BACK of the poster – you can not get an A without citing your sources.

Research Organizer: All of these elements must be included for full credit.

<b>Type of Rock Assigned</b> (Igneous, Sedimentary, Metamorphic)	
<b>How is it classified?</b> (mafic, felsic, intrusive, extrusive, clastic, organic, foliated, nonfoliated, etc)	
<b>Locations on Earth:</b> Where is your rock most abundant, anything special that is location-based	
<b>Composition:</b> What minerals make up your rock. Describe the chemistry of the rock	
<b>How is your rock used by humans?</b>	
<b>Additional Information/Interesting Facts</b> (3 fact minimum, more welcome)	1.  2.  3.

**Citations:** Cite your sources that you will include on the back of your rock poster.
